

Streamlined Technology

Many IT groups encourage their clients to expand and increase their dependence on technology without considering the benefits of streamlining for the most efficient solutions.

SSG is run **not** by technicians, but by professional healthcare business and project managers. We focus on the most efficient technologies to provide the best tools and services, so that your team may concentrate on the important business of medicine.

welcome to

simplify technology

EXPERIENCE The Newest Technology in our Unique Medical Showroom!

SSG maintains a complete mock physician practice with fully operational EMR/PM solutions, compatible technology, optional services and companion programs - allowing you the opportunity to test, try and learn more about your new technology in a true medical workflow environment.

Certified product specialists are available six days a week to guide you through an introduction to a wide variety of technological enhancements for your practice or clinic.

This unique space coupled with our group learning room, is also available for staff product trainings.

Call to schedule a visit to our showroom today!
